Web Tools

Git | GitHub | Dev Tool Bar | Atom | Visual Studio Code | Babel | Postman | Swagger and Minify.

Experience

World of Hyatt

Front-end Developer

January 2019-Now Chicago, IL

- Worked on World of Hyatt website redesign and enhancements.
- Participated along with Dev leads and architect in requirement grooming sessions.
- Migrated a Multi-page user experience into a single page app which improved customer engagement.
- Site's creation includes use of CSS, HTML and JavaScript.
- Designed frontend within objects-oriented JavaScript frameworks like React.JS.
- Responsible for designing page layout using HTML5, CSS3 along with jQuery and adding dynamic functionality to each module.
- Develop application using ReactJS, React-Router and Bootstrap.
- Built custom components for UX consisting of Bootstrap cards, carousels, and Navigation Bars.
- Used Jira for User Stories and Dev Tasks
- Produced website compatible with multiple browsers and responsive view.
- Build Rest API that served data to our JavaScript front end.
- Updated websites and applications to meet usability requirements.

Redbox**Jr. Front-End Developer**

March 2018-December 2019 Chicago, IL

- Worked alongside product owner and Dev leads in Web redesign for Digital launch.
- Specialized frontend developer utilizing HTML, CSS3, CSS, JavaScript, and jQuery.
- Responsible for designing page layout using HTML5, CSS3 along with jQuery and adding dynamic functionality to each module.
- Worked on front end tools for big data projects with react.js, and vanilla JavaScript.
- Customized webpack for project deployment and development of my projects.
- Worked on creating and customizing react components.
- Handled making numerous fixes and changes to site's CSS, using Bootstrap and media queries for adaptive design.
- Implemented a carousel for mobile devices. Carousels use touch events for switching between panels.
- Worked with team members to create consistent, reusable, and maintainable code.

Office Max**Jr. Front-End Developer**

July 2017 – January 2018 Chicago, IL

- Developed new applications and dashboards as well as maintained existing applications using HTML, CSS, JavaScript, Bootstrap and other technologies, frameworks and libraries.
- Incorporated API calls to several applications and stored data efficiently in our PostgreSQL backend.
- Helped introduce and implement react and node technologies to the team.
- Mentored and worked with junior developers to help increase productivity.
- Worked with other developers in giving guidance and help to complete their tasks. Due to time zones, would make myself available after work to help.
- Made adjustments to the CSS given to implement all the JavaScript functionality.
- Performed major updates to dealer site. Added front page specials on homepage that rotated and open in pop-ups.

Projects:**Weather App**
